10. Describe an example of a Tragedy of the Commons.

- Overfishing
- Cutting Down Timber
- Overgrazing
- Ocean Pollution / Atmosphere

11. On the axes to the right, draw a line showing a population that exemplifies logistic growth. (s-curve) and label the carrying capacity.

12. Perform the following calculation. Show all of your work:

In a particular year a population has the following characteristics: the crude birth rate is 45, the crude death rate is 20, the immigration rate is 1%, and the emigration rate is 0.5%. The percent rate of growth for that year is 3%.

Show ALL work:

$$r = \text{Crude birth rate} - \text{crude death rate}$$

$$\frac{45}{1000} \times 100 = 4.5\%$$

$$\frac{20}{1000} \times 100 = 2.0\%$$

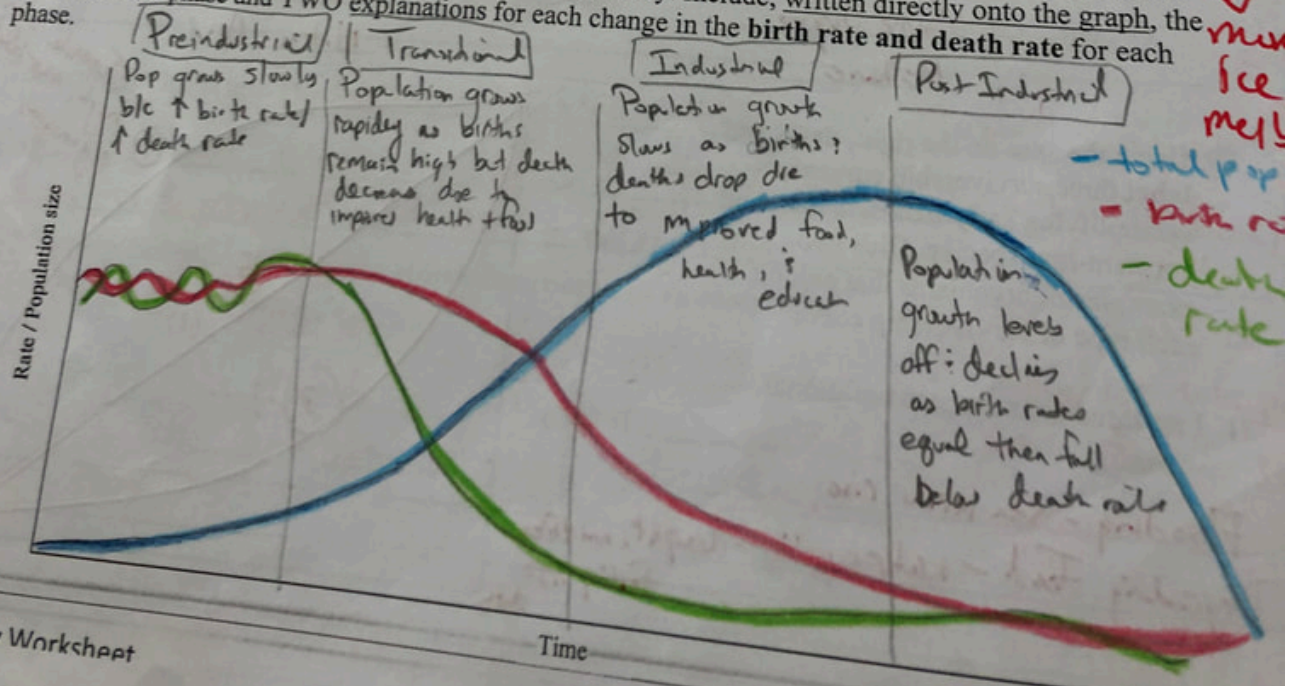

$$4.5\% - 2.0\% + 0.5\%$$

$$5.5\% - 2.5\% = 3\%$$

13. Describe an example of a positive feedback loop.

Amplification (1) Global Climate Change. Melts ice, encourages bacteria decomposition, increase CH₄ (methane gas) production. CH₄ is a GHG! ↑ Global Climate Change. (2) Polar ice melting exposes dark surfaces → more light energy absorption → ↑ temps!

14. Use the axes below to draw and label lines representing the birth rate, death rate and total population size during the idealized demographic transition of a country. Include, written directly onto the graph, the names of each phase and TWO explanations for each change in the birth rate and death rate for each phase.
